

Swordfish UVC Air Treatment Systems

Swordfish UVC Air Treatment Systems safely purify your indoor air to help prevent the spread of **Colds and Flu**, and alleviate **Allergy and Asthma** symptoms by killing the bacteria, viruses, mold, fungi and dust mites that cause them.

Whole Home UVC Air Treatment Systems

- Safely purifies entire home
- Swordfish Lamps produce NO ozone

- Energy efficient electronic ballast
- Safety feature designed to prevent accidental exposure to UVC light
- Built-in lamp replacement indicator (Replace lamp once a year for optimal performance. Easy as changing a light bulb!)
- 3 models available: 18W / 36 W / 60W
- Item # UVA36WB for image above (purifies home up to 3,500 sq. ft.)

PURE AIR

Tested & Proven

UVC technology provides a complete air treatment solution, sanitizing and purifying your indoor air - just as hospitals, food processing plants, and water treatment industries have been doing successfully for many years.

Swordfish UVC Air Treatment Systems are CSA approved and have been tested by Lighting Sciences (University of Waterloo).

- Install in less than 15 minutes
- Plugs into standard 120 V outlet
- 6 ft. power cord included
- Easily mounts to duct work of your existing warm air furnace to purify passing air
- Can also be installed above air conditioning coil to kill and control growth of mold

Inside Ductwork

Portable Room UVC Air Treatment System

- Purifies any room up to 200 sq. ft.
- Lifetime washable antimicrobial filter included
- 2 speed whisper fan for quiet performance
- Child proof/tamper proof locking mechanism for prevention of accidental exposure to UVC
- Plug and play function for immediate use
- Built-in replacement lamp indicator (Replace lamp once a year for optimal performance. Easy as changing a light bulb!)
- Sleek and modern design assimilates well with any decor
- Product dimensions: 7.25"W x 9.25"L x 17.5"H
- Item # UVA1800RM

- Condo
- Apartments
- Nursery
- Main living area
- Mobile Home
- Bedroom
- Office
- Dorms

Swordfish UVC Purifiers Eliminate

viruses
bacteria
dust mites

mold
fungi

With growing demand for a UV air purification system to accommodate individual rooms, smaller spaces, and living spaces without a furnace, Swordfish UV introduced the Portable Room Unit.

Providing you with the same great purifying technology of the Whole Home System, the portable room unit is ideal for any room!

PURE AIR

Indoor Air Quality

As new homes are increasingly designed and constructed air tight, and sealed to prevent heat from escaping, the concentration of airborne contaminants rises, contributing to poor indoor air quality. With less fresh outdoor air entering the home, ideal breeding grounds are created for airborne micro-organisms to thrive and negatively effect your health.

According to the Environmental Protection Agency (EPA), indoor air pollution can rise to unhealthy levels in air tight homes and buildings.

The Power of UVC Light

UVC light technology is considered to perform on a more sophisticated level than other average purifiers, because it does not just trap allergens. Swordfish UVC Air Treatment Systems deactivate the molecular structure/DNA of the airborne micro-organisms and render them harmless to your health. Bacteria, viruses, mold, fungi, dust mites, etc., are prevented from multiplying and spreading, in turn providing relief.

Swordfish UVC Air Treatment Systems operate at a specific non-ozone producing wavelength of UVC that provides sufficient intensity to effectively deactivate various dangerous airborne micro-organisms, such as Influenza, Avian Flu, and others.

**Very Effective During
Allergy & Asthma, Cold
& Flu Seasons!**

Satisfied Swordfish UV Customers!

"I am very satisfied with your product. I have been using it for more than a year now and have gone through two cycles of flu seasons. I can see a drastic difference with the air quality around the house and knowing the lamp is on 24/7 gives me peace of mind."

Johnny, North York

"We noticed a difference in the air after only one hour of having it on. The basement had a crisp clean smell and my nose is no longer stuffy. I also like the fact that it kills viruses and bacteria. I feel it's a more of a precaution this flu season."

Jennifer S.
